

KULR ONE SPACE

SAFETY

Using KULR Technology's proprietary Thermal Runaway Shield (TRS) technology, KULR ONE offers industry leading passive propagation resistance (PPR)

PERFORMANCE

Utilizes top quality and performing 18650 cells that offer fast charge and discharge capability

INTELLIGENCE

Sends battery performance and health data directly to the cloud, so you can monitor, analyze and predict your applications longevity

MODULARITY

Offers you the ability to standardize your battery pack design on a wide variety of your applications, giving your customers flexibility with powering their devices

RELIABILITY

Designed by former NASA Engineers and is manufactured with the highest quality materials, using the most well thought through and vigorously tested designs

CUSTOMIZABILITY

KULR Technology can design and manufacture a battery pack specific for your individual application needs

**RENEWABLE
ENERGY IN A
SAFE, RELIABLE,
AND
SUSTAINABLE
